DISSERTATION

Dissertation Title: Three Essays on Consumer Psychology at the Point of Payment

Committee Members: Suzanne B. Shu (Chair), Kaitlin Woolley, David Pizarro

Essay 1: Buy Now, Pain Less: The Impact of Adding a Financing Option to Affordable Purchases

With the rise of Buy Now, Pay Later financing, consumers are increasingly encountering financing options for purchases traditionally paid for in full. This research investigates how merely displaying a financing option influences consumers intending on paying outright. A series of controlled shopping simulations shows that the presence (vs. absence) of financing, even when not used, increases subjective wealth perceptions which increases purchase completion intentions. This is because when financing options are available, the preference to pay outright is seen as a sign of higher social status, elevating subjective status of consumers who prefer such payment. This effect attenuates among consumers who already perceive themselves as having high social status or in contexts where the association between financing and lower status is less pronounced. By identifying how the mere presence of financing affects consumers uninterested in using it, we advance theory and practice on payment methods, subjective wealth, and cart abandonment.

Essay 2: The Interactive Effect of Incentive Salience and Prosocial Motivation on Prosocial Behavior

Charities often use incentives to increase prosocial action. However, possibly to avoid de-motivating donors, charities sometimes downplay these incentives in their messaging (Pilot Study). We challenge this strategy, examining whether increasing the salience of incentives for prosocial action can in fact motivate charitable behavior. Three controlled experiments (N = 2,203 adults) and a field study with an alumni donation campaign (N = 22,468 adults) find that more (vs. less) salient incentives are more effective at increasing prosocial behavior when prosocial motivation is low (vs. high). This is because more (vs. less) salient incentives increase relative consideration of self-interest (vs. other-regarding) benefits, which is a stronger driver of behavior at low (vs. high) levels of prosocial motivation. By identifying that prosocial motivation moderates the effect of incentive salience on charitable behavior, and by detailing the underlying mechanism, we advance theory and practice on incentive salience, motivation, and charitable giving.

Essay 3: Increasing Hotel Loyalty Through Psychological Ownership

The hospitality industry has long recognized guest satisfaction as a key to build loyalty. However, in such a highly competitive market, the marginal utility of enhancing guest satisfaction on loyalty diminishes. This research proposes psychological ownership of a hotel room as a novel factor increasing guest loyalty, particularly when guest satisfaction levels are already high. An analysis of 14,689 online reviews on

TripAdvisor, a naturalistic field experiment in a hotel, as well as two controlled lab simulation studies (combined N = 1,084) jointly demonstrate that increasing psychological ownership of hotel rooms significantly increases intentions to engage in loyalty-related behaviors, even though it does not necessarily increase guest satisfaction. This work extends our current understanding of psychological ownership and customer loyalty by demonstrating that the impact of psychological ownership of a hotel room on hotel loyalty is independent from the effects of customer satisfaction. More broadly, we highlight the role of psychological ownership as an underexplored driver of hotel loyalty, beyond the traditional focus on satisfaction.

The Award of Academic Excellence, Korea University Business School	2019
Conference Travel Grant, Korea University Business School	2018
Graduate Fellowship, Korea University Business School	2018-2019
Best Paper Award, the Korean Academic Association of Business Administration	2016
Communication Studies Departmental Honors, UCLA	2015
College Honors, UCLA	2015
Undergraduate Research Week Department Representative, UCLA	2015
Conference Travel Grant, UCLA	2015
Research Fellowship Scholarship, UCLA	2015

TEACHING INTERESTS

Consumer Behavior, Marketing Management, Brand Management, Managerial Decision Making, Digital Marketing

TEACHING EXPERIENCE

Course Instructor

Cornell University

Marketing Management (undergraduate & graduate)	Spring 2023
Instructor Rating 4.8/5.0; School average: 4.3	

Selected comments from students:

“This class was a highlight of my time at Cornell”

“I have had the privilege of taking Rin’s NCC 5530, which has been instrumental in shaping my understanding not only of marketing-related knowledge but also of what it is like to be a good educator. I am really inspired by her teaching style and surprised by the impact she has made.”

“The class was super fun and Rin always made sure to go the extra mile to help us understand the course material and engage with real world marketing problems.”

“I love her class so much and her class made me find out what I am passionate about. I just found a marketing intern job for this summer and will apply the knowledge she taught us this semester to reality.”

“She is so enthusiastic about teaching and guiding us to participate in class, as well as learn the material. I am always excited about her class, and all material can be applied to the assignments and projects. To be honest I hope she can teach more classes.”

Marketing Management (undergraduate & graduate)	Spring 2025 (scheduled)
